

**Computer Ethics in Programming  
Summary Paper  
Advanced Computer Programming AP**

You will start by visiting the following two Internet web sites for professional organizations in Computer Programming.

The first is the Association of Computing Professionals at:

<http://www.acm.org/constitution/code.html>.

The second site is a professional engineering association, IEEE located at:

<http://www.ieee.org/portal/pages/iportals/aboutus/ethics/code.html>.

Read (and print out) carefully the code of ethics and professional conduct pages at these sites. You will need the print outs for your CS notebook that you will keep this year.

Your job is to read the information carefully, and write a two page SUMMARY of the code of ethics at these two sites. This paper is to be a summary of information pertaining to computer ethics at these two sites. It is NOT a paper to include your personal feelings or philosophies about computer ethics. It is strictly a summary of the ideas found at the above-mentioned web pages.

It needs to be typed, three full pages, double spaced, Times New Roman Font size 12, with one inch margins at the Top, Bottom, Left, and Right. Please use APA format for your paper. You will also need a cover page and a reference page (these do not count in the three page minimum). Don't forget to properly cite your references, which are the URL's listed above. If you aren't sure how to cite your sources or format your paper using APA, please visit the Purdue University Online Writing Lab at <http://owl.english.purdue.edu/owl/resource/560/01/>.

Do not copy and paste any text from either web page, you are to summarize these pages in your own words.

**YOUR PAPER WILL BE DUE ON THE FIRST DAY OF CLASS. THERE WILL BE NO ACCEPTANCE OF LATE WORK.**
